

158th (B) Meeting of State Level Expert Appraisal Committee (SEAC-1)**SEAC Meeting number: 158th (B) ,Day-3 Meeting Date January 4, 2019****Subject:** Environment Clearance for Storage of Chlorine 50 TPD & DG Set Installation of 6750 KVA (Existing 4500 KVA + Proposed 2250 KVA)**Is a Violation Case:** No

1.Name of Project	Sterlite Technologies Ltd.
2.Type of institution	Private
3.Name of Project Proponent	Mr. Arun Gandhi
4.Name of Consultant	Gaurang Environmental Solutions
5.Type of project	Industrial Project
6.New project/expansion in existing project/modernization/diversification in existing project	Expansion
7.If expansion/diversification, whether environmental clearance has been obtained for existing project	NA
8.Location of the project	Plot No. A- 1/7
9.Taluka	Aurangabad
10.Village	Shendra
Correspondence Name:	Sterlite Technologies Ltd , MIDC Shendra, Aurangabad. Maharashtra-India
Room Number:	Plot No. A-1/7
Floor:	NA
Building Name:	NA
Road/Street Name:	Shendra MIDC Road
Locality:	Shendra MIDC
City:	Aurangabad
11.Area of the project	MIDC
12.IOD/IOA/Concession/Plan Approval Number	NA IOD/IOA/Concession/Plan Approval Number: NA Approved Built-up Area: 45377
13.Note on the initiated work (If applicable)	NA
14.LOI / NOC / IOD from MHADA/ Other approvals (If applicable)	NA
15.Total Plot Area (sq. m.)	101805.11
16.Deductions	10180
17.Net Plot area	91624.60
18 (a).Proposed Built-up Area (FSI & Non-FSI)	a) FSI area (sq. m.): Not applicable b) Non FSI area (sq. m.): Not applicable c) Total BUA area (sq. m.): 45377
18 (b).Approved Built up area as per DCR	Approved FSI area (sq. m.): Not applicable Approved Non FSI area (sq. m.): Not applicable Date of Approval: 25-05-2018
19.Total ground coverage (m2)	23244.72
20.Ground-coverage Percentage (%) (Note: Percentage of plot not open to sky)	0.25
21.Estimated cost of the project	900000000

Power requirement:	Source of power supply :	State Electricity Board
	During Construction Phase: (Demand Load)	50 KW
	DG set as Power back-up during construction phase	500 KVA
	During Operation phase (Connected load):	0.5 MW
	During Operation phase (Demand load):	0.5 MW
	Transformer:	Yes
	DG set as Power back-up during operation phase:	6750 KVA
	Fuel used:	HSD
	Details of high tension line passing through the plot if any:	NO

48. Energy saving by non-conventional method:

Street Light on Solar Energy

49. Detail calculations & % of saving:

Serial Number	Energy Conservation Measures	Saving %
1	Street Light	5 %

50. Details of pollution control Systems

Source	Existing pollution control system	Proposed to be installed
Process Vent Scrubber	0	Stack Height - 30 m With HCl Analyser
Emergency Vent Scrubber	0	Stack Height - 30 m With HCl Analyser
Emergency Chlorine Scrubber	0	Stack Height - 30 m With Chlorine Sensor
DG Set	0	Stack Height - 30 m

Budgetary allocation (Capital cost and O&M cost):

Capital cost:	25 Lacks
O & M cost:	2.5 Lacks

51. Environmental Management plan Budgetary Allocation

a) Construction phase (with Break-up):

Serial Number	Attributes	Parameter	Total Cost per annum (Rs. In Lacs)
1	Sanitation	Water Supply	20

Disaster management system and risk assessment	Not Applicable
Socioeconomic impact assessment	Not Applicable
Environmental Management Plan	Not Applicable
Any other issues related to environmental sustainability	Not Applicable

Brief information of the project by SEAC

PP submitted their application for the grant of TOR under category 6(b)B1 as per EIA Notification, 2006. PP presented draft TOR based on standard TOR issued by MoEF & CC published in April, 2015.

DECISION OF SEAC

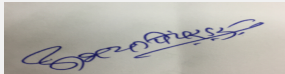

During deliberations with the PP and their accredited consultant, it is observed that, total plot area is not sufficient for development of mandatory 33% green belt. PP proposes 20% green belt within the plot area and is willing to compensate deficit by development of the green belt on other plot Nos. D-199,200 owned by them in the same MIDC.

In view of above, SEAC decided to refer the matter to the SEIAA for guidance whether deficit to achieve 33% green belt can be compensated through plantation on other plot owned by PP in the same MIDC for compliance of the condition as stipulated in the OM issued by MoEF&CC dated 09.08.2018.

Specific Conditions by SEAC:

FINAL RECOMMENDATION

Kindly find SEAC decision above.

Sewage and Waste water	Sewage generation in KLD:	12.0 KLD
	STP technology:	Sewage waste water will be treated in the aeration tank of the effluent treatment plant.
	Capacity of STP (CMD):	NA
	Location & area of the STP:	NA
	Budgetary allocation (Capital cost):	NA
	Budgetary allocation (O & M cost):	NA

36.Solid waste Management

Waste generation in the Pre Construction and Construction phase:	Waste generation:	Construction debris will be generated after construction of proposed structures.
	Disposal of the construction waste debris:	It will be used within the plant premises for levelling purposes and the metal scrap will be sold to authorised vendors.
Waste generation in the operation Phase:	Dry waste:	M.S Scrap - 10.0 MT/A, Wooden Palate - 1000 Nos/A, Paper Waste - 100 Kg/M, Battery Waste - 5 Kg/A, E-Waste - 5 Kg/A.
	Wet waste:	NA
	Hazardous waste:	Residue & Waste - 67 MT/ M, Discarded Container/Barrels/ Liners - 1000 nos./ Annum, ETP Sludge - 19.2 MT/A, MEE Residue - 300 MT/M, Spent oil - 0.2 MT/M, Distillation Residue - 78.5 MT/M, Spent solvents - 0.3365 MT/M
	Biomedical waste (If applicable):	NA
	STP Sludge (Dry sludge):	NA
	Others if any:	NA
Mode of Disposal of waste:	Dry waste:	Sold to authorised vendors
	Wet waste:	NA
	Hazardous waste:	The recyclable wastes like Discarded Container/Barrels/ Liners, spent oil, spent solvents, will be sold to approved recyclers, other hazardous waste will be sent to CHWTSDF, Ranjangaon for disposal.
	Biomedical waste (If applicable):	NA
	STP Sludge (Dry sludge):	NA
	Others if any:	NA
Area requirement:	Location(s):	Dedicated Hazardous Waste storage area of 40 sq. m. will be provided near ETP Area.
	Area for the storage of waste & other material:	Dedicated Hazardous Waste storage area of 40 sq. m. will be provided
	Area for machinery:	NA
Budgetary allocation (Capital cost and O&M cost):	Capital cost:	5 lakhs
	O & M cost:	25 lakhs

37.Effluent Charecterestics

Abhay Pimparkar (Secretary SEAC-I)

**SEAC Meeting No: 158th (B) ,Day-3 Meeting
Date: January 4, 2019**

**Page 15
of 63**

Signature:

Name: Dr. Umakant Gangotree Dangat

**Dr. Umakant Dangat
(Chairman SEAC-I)**

Serial Number	Parameters	Unit	Inlet Effluent Charecterestics	Outlet Effluent Charecterestics	Effluent discharge standards (MPCB)
1	pH	-	5.8	7.2	5.5-9
2	TDS	mg/l	35,000	100	2100
3	BOD	mg/l	4700	12	250
4	COD	mg/l	12500	30	30
5	O & G	mg/l	6.6	BDL	10
Amount of effluent generation (CMD):		70.65			
Capacity of the ETP:		75 CMD			
Amount of treated effluent recycled :		The treated effluent will be entirely reused for cooling tower - makeup. It is a ZLD project.			
Amount of water send to the CETP:		Nil. Company will operate as a ZLD unit.			
Membership of CETP (if require):		Not Applicable. Company will operate as a ZLD Unit.			
Note on ETP technology to be used		The Company will operate as ZLD Unit. Effluent streams will be segregated as High TDS, High COD and low conc. Streams depending on their characteristics will be treated separately . The high TDS effluent will be treated through an MEE,ATFD, the condensates along with low conc. effluent and sewage will be treated in aeration tank of ETP. The boiler and cooling tower blowdowns will be sent to R.O after primary treatment and the R.O reject will be sent to MEE. The industry will operate as a ZLD uni			
Disposal of the ETP sludge		ETP sludge will be disposed off to CHWTSDF, Ranjangaon.			

38.Hazardous Waste Details

Serial Number	Description	Cat	UOM	Existing	Proposed	Total	Method of Disposal
1	Residue & Waste	28.1	MT/M	0.1	66.9	67	To CHWTSDF
2	Discarded Container/Barrels/ Liners	33.3	Nos/ Annum	200	800	1000	To authorized recyclers
3	ETP Sludge	34.3	MT/A	2.0	17.2	19.2	To CHWTSDF
4	MEE Residue	37.3	MT/M	-	300	300	To CHWTSDF/ sold to authorized vendors
5	Spent oil	5.1	MT/M	-	0.2	0.2	To authorized recyclers
6	Distillation Residue	36.1	MT/M	-	78.5	78.5	To CHWTSDF/To Authorised recyclers
7	Spent solvents	28.6	MT/M	-	0.3365	0.3365	To authorized reprocessors

39.Stacks emission Details

Serial Number	Section & units	Fuel Used with Quantity	Stack No.	Height from ground level (m)	Internal diameter (m)	Temp. of Exhaust Gases
1	(Existing) 2 MT/Hr steam boiler	Coal: 4.2 MT/D (for all the existing utilities)	1	30	0.8	140-160°C
2	(Existing) 4 lakh kcal Thermic Fluid Heater	Coal: 4.2 MT/D (for all the existing utilities)	1	30	0.8	140-160°C
3	(Existing) 10 lakh kcal Thermic Fluid Heater	Coal: 4.2 MT/D (for all the existing utilities)	1	30	0.8	140-160°C
4	(Existing) 225 kVA Diesel Generator	High Speed Diesel : 30 Kg/hr (40 L/Hr)	1	3.0 (above roof level)	0.1	156°C

9	(Proposed) 500 KVA Diesel Generator	High Speed Diesel : 75 Kg/Hr (100 L/Hr)	1	4.5 m above roof top level	0.4	160-180°C

40.Details of Fuel to be used

Serial Number	Type of Fuel	Existing	Proposed	Total
1	Coal/Briquette	4.2 MT/D/--	23 MT/D / 30 MT/D	27.2 MT/D / 30 MT/D
2	High speed diesel	30 Kg/Hr (40 L/Hr)	150 Kg/Hr (200 L/Hr)	180 Kg/Hr (240 L/Hr)
41.Source of Fuel		Coal : Local Supplier Briquette : Local Supplier High speed diesel: Local HP vendor		
42.Mode of Transportation of fuel to site		By Road		

43.Green Belt Development	Total RG area :	9339.0 sq. m.
	No of trees to be cut :	NA
	Number of trees to be planted :	1401 Nos.
	List of proposed native trees :	Cassia fistula, Bombax ceiba, Asltonia shcolaris, Macaranga peltata, Schleicheria oleosa, Microcos paniculata, Terminalia elliptica, Terminalia paniculata, Terminalia bellirica, Cordia dichotoma, Helicteres isora, Holoptelea integrifolia, Butea monosperma, Oroxylum indicum, Erythrina suberosa, Azadirachta indica, Trema orientalis, Pongamia pinnata, Neolamarckia cadamba, Pterospermum acerifolium, Dalbergia sissoo, Pongamia pinnata
	Timeline for completion of plantation :	3 years after grant of environmental clearance

44.Number and list of trees species to be planted in the ground

Serial Number	Name of the plant	Common Name	Quantity	Characteristics & ecological importance
1	Cassia fistula	Bahava	67	Native tree of forest tracts of Sahyadri ranges having flowers attracting bees and butterflies
2	Bombax ceiba	Sawar	67	A native deciduous tree with fragrant flowers attracting large number of birds & insects
3	Asltonia shcolaris	Saptaparni	67	A native evergreen tree with fragrant flowers & leaves having comparatively higher dust settling index
4	Macaranga peltata	Chandwar	67	A native tree found in abundance across the plains of Sahyadri ranges

Abhay Pimparkar (Secretary SEAC-I)

**SEAC Meeting No: 158th (B) ,Day-3 Meeting

5	Schleichera oleosa	Kusum	67	A native deciduous trees of forest tracts of Sahyadri ranges
6	Microcos paniculata	Shirali	67	A native evergreen medium sized tree of forest tracts of Sahyadri ranges
7	Terminalia elliptica	Ain	67	A native evergreen tree of forest tracts of Sahyadri ranges
8	Terminalia paniculata	Kindal	67	A native deciduous tree of forest tracts of Sahyadri ranges
9	Terminalia bellirica	Baheda	67	A native deciduous tree of forest tracts of Sahyadri ranges
10	Cordia dichotoma	Shelu	67	A native deciduous tree of forest tracts of Sahyadri ranges attracting large number of insects
11	Helicteres isora	Murudsheng	67	A native deciduous medium sized tree of forest tracts of Sahyadri ranges visited by large number of birds
12	Holoptelea integrifolia	Ainsadada	67	A native deciduous tree of forest tracts of Sahyadri ranges
13	Butea monosperma	Palash	67	A native brilliantly flowering tree abundant the Palghar District visited by large number of birds
14	Oroxylum indicum	Tetu	67	A native ornamental tree
15	Erythrina suberosa	Pangara	67	A native deciduous medium sized tree of forest tracts of Sahyadri ranges visited by large number of birds
16	Azadirachta indica	Kadulimb	67	A native evergreen tree capable of surviving in comparatively polluted environs
17	Dalbergia sissoo	Shisham	67	A native evergreen tree attracting large number of insects
18	Trema orientalis	Ghol	67	A native deciduous medium sized tree with hairy leaves having comparatively higher dust settling index
19	Pongamia pinnata	Karanj	67	A native deciduous tree well suited to intense heat and sunlight and drought tolerant.
20	Neolamarckia cadamba	Kadamba	67	A native evergreen tree with tremendous blooms attracting large number of insects
21	Pterospermum acerifolium	Karnikar	61	A native evergreen tree with large & hairy leaves having comparatively high dust settling index generally used for ornamental plantation

45.Total quantity of plants on ground

46.Number and list of shrubs and bushes species to be planted in the podium RG:

Power requirement:	Source of power supply :	Maharashtra State Electricity Distribution Company Limited (MSEDCL)
	During Construction Phase: (Demand Load)	63 KVA
	DG set as Power back-up during construction phase	NA
	During Operation phase (Connected load):	1725 KW
	During Operation phase (Demand load):	1475 KVA
	Transformer:	1475 KVA
	DG set as Power back-up during operation phase:	1 x 225 KVA , 2 x 500 KVA
	Fuel used:	High Speed Diesel
	Details of high tension line passing through the plot if any:	NA
48. Energy saving by non-conventional method:		
Solar power will be used for office building and street lights.		
49. Detail calculations & % of saving:		
Serial Number	Energy Conservation Measures	Saving %
1	Not Applicable	Not Applicable
50. Details of pollution control Systems		
Source	Existing pollution control system	Proposed to be installed
Air	Stack height of 30m each have been provided to existing boiler & 2 nos of thermopac having capacities 2 MT/Hr, 4 Lakh Kcal/Hr & 10 Lack kcal/Hr respectively to ensure effective dispersion of pollutants. 4m stack height for existing D. G set of 225 KVA capacity .	<ul style="list-style-type: none"> Stack of 32m will be provided to the proposed boiler of capacity 6 MT/Hr Stack of 30m will be provided to the proposed thermopac of capacity 10 Lakh Kcal/Hr Stack of 5 m (above roof) will be provided to the proposed Alkaline scrubber Stack of 4.5m (above roof top) each will be provided to the proposed 2 nos of D.G. set of capacity 500 KVA. The existing boilers are provided with cyclone seperators, however the proposed boilers will be provided with multicyclone seperators followed by ba
Water.	ETP of 1 CMD capacity comprising of Primary, Secondary and Tertiary Treatment.	The company will operate as a ZLD unit ETP of 75 CMD capacity will be provided
Noise	Acoustic enclosures have been provided to D.G Sets. Preventive maintenance of all the noise generating equipments is/will be done	Acoustic enclosures will be provided to the proposed D.G Sets. A thick green belt will be provided on the periphery of the plant premises.
Solid hazardous waste	The hazardous waste is stored in a separate demarcated area, the recyclables are sent to authorized vendors and the rest are sent to CHWTSDF for disposal	Existing pollution control systems are sufficient for the proposed expansion
Budgetary allocation (Capital cost and O&M cost):	Capital cost:	500000
	O & M cost:	10000

Brief information of the project by SEAC

PP submitted their application for the grant of TOR under category 5(f)B1 as per EIA Notification, 2006. PP presented draft TOR based on standard TOR issued by MoEF & CC published in April, 2015.

PP to ascertain and submit notification stating that existing plot is located in the Notified Industrial Estate/Park/Area. In absence of the credible documents regarding notified Industrial Estate/Park/Area, PP to carry out Public Consultation as per procedure stipulated in the EIA Notification 2006 and submit compliance report of the issues raised during Public Consultation.

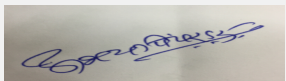

PP to collect base line data as per Office Memorandum issued by MoEF&CC dated 27.08.2017.

The validity of the TOR will be for three years as per OM issued by MoEF and CC on 29.08.2017.

PP to submit Form - 2 along with EIA/EMP report as per OM issued by MoEF&CC on 20.04.2018.

PP to submit their plan to utilize CER (Corporate Environment Responsibility) along with timelines as per OM issued by MoEF&CC dated 01.05.2018.

DECISION OF SEAC

Abhay Pimparkar (Secretary
SEAC-I)

SEAC Meeting No: 158th (B) ,Day-3 Meeting
Date: January 4, 2019

Page 23
of 63

Signature: 
Name: Dr. Umakant Dangat
Dr. Umakant Dangat
(Chairman SEAC-I)

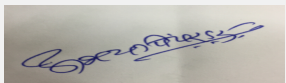

Draft Terms of Reference (TOR) have been discussed and finalized during the meeting of SEAC-1. The committee prescribed the following additional TOR along with Standard TOR as available on the Ministry of Environment, Forest and Climate Change website for preparation of EIA-EMP report.

Specific Conditions by SEAC:

- 1) PP to submit certificate of incorporation of the company, list of directors and memorandum of articles.
- 2) PP to submit lay out plan showing internal roads with six meter width and nine meter turning radius, location of pollution control equipment, parking areas, 33% green belt with its dimensions, rain water harvesting structures (locations with dimensions), storm water drain lines, along with index and area statement showing calculations for each area and cross sections of storm water drain and rain water harvesting pits etc.
- 3) PP to submit storm water drain and rain water harvesting drawing superimposing contour levels on the layout.
- 4) PP to submit undertaking for not violating the requirements of EIA Notification, 2006.
- 5) PP to carry out life cycle analysis of the activities carried out on site with respect to the acidification potential, eutrophication potential, green house and ozone depletion potential etc
- 6) PP to include detailed material balance charts for each product showing consumption of raw material, sources of pollution and mitigation measures to control the pollution and justified use of resources along with quantities in the EIA report.
- 7) PP to include detailed water balance calculations along with design details of zero liquid discharge ETP in the EIA report.
- 8) PP to carry out HAZOP and QRA and submit disaster management plan.
- 9) PP to submit hazardous chemical handling protocol
- 10) PP to submit technical note on how proposed expansion will be accommodated in the existing facility along with structural stability certificate of existing buildings.
- 11) PP to explore possibility to optimize process and production technology to reduce generation of liquid/solid/gaseous wastes and include the same in the EIA report.
- 12) PP to include water and carbon foot print monitoring in the monitoring schedule and EMP.
- 13) PP to use new and renewable energy for illumination of office buildings, street lights, parking areas and maintain the same regularly PP to provide lightning arrestor.

FINAL RECOMMENDATION

The Committee decided to Grant ToR subject to the above observations, PP requested to prepare and submit EIA report as per EIA Notification, 2006 and amendments thereof.

--	--	--	--	--	--	--	--	--	--

34.Rain Water Harvesting (RWH)	Level of the Ground water table:	More than 20 m bgl
	Size and no of RWH tank(s) and Quantity:	Quantity -50000 Liter is provided
	Location of the RWH tank(s):	Towards North East of the plot
	Quantity of recharge pits:	Not Applicable
	Size of recharge pits :	Not Applicable
	Budgetary allocation (Capital cost) :	4 lakhs
	Budgetary allocation (O & M cost) :	15,000/-
	Details of UGT tanks if any :	UGT tanks : 1 No. Existing & 1 No. Proposed Existing UG Tank capacity : 50,000 Lit & Proposed UG Tank capacity : 3 Lakh/Lit (size : 3m diameter).

--	--	--	--	--	--	--	--	--	--

35.Storm water drainage	Natural water drainage pattern:	Storm water drains of adequate capacity will be provided.
	Quantity of storm water:	7.2 m3/hr
	Size of SWD:	The SWD will be designed as per the quantity of storm water to be received during the rainy season.

--	--	--	--	--	--	--	--	--	--

Sewage and Waste water	Sewage generation in KLD:	10 CMD
	STP technology:	Septic tank overflow will be mixed with aeration Tank.
	Capacity of STP (CMD):	Not Applicable
	Location & area of the STP:	Not Applicable
	Budgetary allocation (Capital cost):	Not Applicable
	Budgetary allocation (O & M cost):	Not Applicable

36.Solid waste Management

Waste generation in the Pre Construction and Construction phase:	Waste generation:	Demolition & Construction wastes such as debris, scraps, excavated soil, cement bags, iron/steel scraps & cardboards.
	Disposal of the construction waste debris:	Construction waste will be landfilled within plot.

Waste generation in the operation Phase:	Dry waste:	Coal ash : Qty -117.46 MT/month
	Wet waste:	Not Applicable
	Hazardous waste:	Chemical sludge from waste water treatment (1.5 MT/D) , Empty bags(52 nos.) , Empty drums(8nos.) , Distillation Residue (1.167 MT/M) & MEE residue, (364 Kg/M), Waste oil (20 Kg/M) &Spent solvent (52Kg/M).
	Biomedical waste (If applicable):	Cat. yellow -Soiled waste (Items contaminated with blood, body fluids like dressings, plaster casts, cotton swabs and bags containing residual or discarded blood and blood components) - 8 kg/A, cat. yellow-Expired medicines (Pharmaceutical waste like antibiotics, cytotoxic drugs including all items contaminated with cytotoxic drugs or plastic ampoules) - 6 kg/A

Mode of Disposal of waste:	Dry waste:	Through local municipal waste disposal system or authorised recycler/ re-processor/brick manufacturer.
	Wet waste:	Not Applicable
	Hazardous waste:	Chemical sludge from waste water treatment, Empty bags, Empty drums, Distillation Residue & MEE residue will be disposed to CHWTSDF, Waste oil & Spent solvent will be disposed to CHWTSDF or sold to authorized recycler.
	Biomedical waste (If applicable):	Disposal to CBMWTF/ MPCB authorised processor for Buldana region.
	STP Sludge (Dry sludge):	Not Applicable
	Others if any:	E-Waste Mode of Disposal: Sale to MPCB authorised recycler/returned to manufacturer/supplier; Battery Waste Mode of Disposal: Sale to supplier/MPCB authorised party.
Area requirement:	Location(s):	Dedicated hazardous waste storage area will be provided as per the project plot layout.
	Area for the storage of waste & other material:	100 sq.m
	Area for machinery:	Not Applicable
Budgetary allocation (Capital cost and O&M cost):	Capital cost:	0
	O & M cost:	2 lakhs/ year

37.Effluent Charecterestics

Serial Number	Parameters	Unit	Inlet Effluent Charecterestics	Outlet Effluent Charecterestics	Effluent discharge standards (MPCB)
1	pH	--	1.16	7.5	6.0 - 8.5
2	TDS	mg/l	22300	370 mg/l	<2100
3	BOD	mg/l	1028	7.2 mg/l	<100
4	COD	mg/l	3000	20 mg/l	<250
5	O & G	mg/l	2.4	< 1 mg/l	<10

Amount of effluent generation (CMD): Total industrial effluent shall be 57.1 CMD and domestic effluent shall be 10 CMD

Capacity of the ETP: 100 CMD

Amount of treated effluent recycled : 56.76 CMD

Amount of water send to the CETP: --

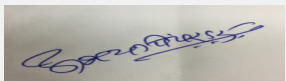

Membership of CETP (if require): --

Note on ETP technology to be used --

Disposal of the ETP sludge CHWTSDF

38.Hazardous Waste Details

Serial Number	Description	Cat	UOM	Existing	Proposed	Total	Method of Disposal
1	Distillation Residue	20.3	MT/M	0.5	1.167	1.667	CHWTSDF
2	Chemical Sludge from waste water Treatment	35.3	MT/M	0.5	1.5	2.0	CHWTSDF
3	MEE residue	37.3	Kg/M	-	364	364	CHWTSDF
4	Waste oil	5.1	Kg/M	-	20	20	CHWTSDF/ authorized recycler

6	Empty drums	33.1	No./M	-	8	8	CHWTSDF
7	Spent solvent	20.2	Kg/M	-	52	52	CHWTSDF/ authorized recycler

39.Stacks emission Details

Serial Number	Section & units	Fuel Used with Quantity	Stack No.	Height from ground level (m)	Internal diameter (m)	Temp. of Exhaust Gases
1	Existing Common Stack attached to Boiler & Thermopack	Coal/Agro waste	1	30.5 m	1.0 m	280-300°C
2	Proposed Common Stack attached to Boiler & Thermopack	Coal/Agro waste	1	30 m	1.0 m	280-300°C
3	Stack attached to DG set	HSD	1 No. Existing & 1 No. proposed	3 m above roof	0.25 m	80-90°C
4	Stack attached to Scrubber	--	3 Nos. Existing 1 No. proposed	5 m above roof	0.153 m	50-60°C

40.Details of Fuel to be used

Serial Number	Type of Fuel	Existing	Proposed	Total
1	Coal/Agro Waste	23.9 MT/D (995.83 Kg/Hr) Coal/Agro Waste	13.75 MT/D (572.91 Kg/Hr) Coal/Agro Waste	37.65 MT/D (1568.75 Kg/Hr) Coal/Agro Waste
2	HSD	(60 Lit/Hr) HSD	(194 Lit/Hr) HSD	(254 Lit/Hr) HSD

41.Source of Fuel Local Vendor

42.Mode of Transportation of fuel to site By Road

43.Green Belt Development

Total RG area :	11005 sq.m
No of trees to be cut :	--
Number of trees to be planted :	Existing no. of trees - 500 Nos. Total no of trees to be planted - 1650 Nos.
List of proposed native trees :	Cassia fistula, Bombax ceiba, Macaranga peltata, Schleicheria Oleosa, Microcos Paniculata, Terminalia elliptica , Terminalia Paniculata , Terminalia bellirica, Cordia dichotoma, Helicteres isora, Holoptelea integrifolia, Butea monosperma, Oroxylum indicum, Azadirachta Indica , Callicarpa tomentosa, Neolamarckia cadamba, Pterospermum acerifolium
Timeline for completion of plantation :	2 years after grant of Environmental clearance

44.Number and list of trees species to be planted in the ground

Serial Number	Name of the plant	Common Name	Quantity	Characteristics & ecological importance
---------------	-------------------	-------------	----------	---

Dr. Umakant Dangat
(Chairman SEAC-I)

1	Cassia fistula	Bahava	75	Native ornamental tree having flowers attracting bees and butterflies.
2	Bombaxceiba	Sawar	61	A native tree with large showy flowers visited by birds.
3	Bombaxceiba	Sawar	61	A native tree with large showy flowers visited by birds.
4	Macaranga peltata	Chandwar	76	A native tree found in abundance across the sahyadri range.
5	Schleichera oleosa	Kusum	68	A native tree found in abundance in Sahyadris.
6	Microcos paniculata	Shirali	50	A native evergreen tree abundantly found across the Sahyadri ranges.
7	Terminalia elliptica	Ain	86	A native evergreen broad leaved tree common in the Sahyadris.
8	Terminalia paniculata	Kindal	68	Kindal is a tropical tree with a large natural distribution in Western Ghats.
9	Terminalia bellirica	Baheda	78	A native medicinally important tree.
10	Cordia dichotoma	Shelu	68	Native deciduous tree attracting various insects.
11	Helicteres isora	Murudsheng	45	A native shrub extensively found in the tracts & plains of sahyadri used as roost plant by variety of birds.
12	Holoptelea integrifolia	Vavala	60	A native tree abundantly found in Buldhana District
13	Buteamonosperma	Palash	58	A native brilliantly flowering tree fed by local birds fairly common and abundant across the Buldhana District.
14	Oroxylum indicum	Tetu	91	A native ornamental tree.
15	Azadirachta Indica	Neem	68	A native evergreen tree known for plantation in polluted area.
16	Callicarpato mentosa	Aisar	66	A native evergreen tree with beautiful flowers & thick hairy leaves which helps in dust settling.
17	Neolamarckia Cadamba	Kadamba	70	A native evergreen tree with thick canopy.
18	Pterospermum acerifolium	Muchkund	62	A native ornamental tree.
45.Total quantity of plants on ground				
46.Number and list of shrubs and bushes species to be planted in the podium RG:				
Serial Number	Name	C/C Distance	Area m2	
1	Not Applicable	Not Applicable	Not Applicable	
47.Energy				

Power requirement:	Source of power supply :	Maharashtra State Electricity Distribution Company Limited (MSEDCL)
	During Construction Phase: (Demand Load)	100 KVA
	DG set as Power back-up during construction phase	NA
	During Operation phase (Connected load):	750 KW
	During Operation phase (Demand load):	1000 KVA
	Transformer:	500 KVA X 2 Nos
	DG set as Power back-up during operation phase:	1000 KVA
	Fuel used:	254 Lit/Hr. HSD for DG set during power failure
	Details of high tension line passing through the plot if any:	---
48. Energy saving by non-conventional method:		
Solar street lights shall be provided within premises.		
49. Detail calculations & % of saving:		
Serial Number	Energy Conservation Measures	Saving %
1	Not Applicable	Not Applicable
50. Details of pollution control Systems		
Source	Existing pollution control system	Proposed to be installed
Emissions from Boiler/TFH	Multi Cyclone Separator is attached to common stack of 30.5 m	Multi-cyclone separator followed by Bag Filter will be attached to common stack of 30.5 m
Process Emission	3 Nos. of Scrubber & stack height of 5 m above roof is provided.	1 No. of Scrubber will be installed & stack height of 5m above roof will be provided.
Noise Pollution & Air Emissions from DG set	Stack height of 3 m above roof is provided	Stack height of 3 m above roof will be provided.
Solid hazardous Waste	Sent to authorized recycler or for disposal to CHWTSDF	Will be sent to authorized recycler or for disposal to CHWTSDF
Waste water	ETP of 60 CMD capacity comprising of primary, secondary & tertiary treatment scheme & MEE of 30 CMD capacity is provided.	ETP of 100 CMD capacity comprising of primary, secondary & tertiary treatment scheme & MEE of 100 CMD capacity and RO plant is proposed.
Solid non-hazardous Waste	sold to authorised re-processor/brick manufacturer/ scrap vendors	sold to authorised re-processor/brick manufacturer/ scrap vendors
Budgetary allocation (Capital cost and O&M cost):	Capital cost:	Not Applicable
	O & M cost:	Not Applicable

51.Environmental Management plan Budgetary Allocation

a) Construction phase (with Break-up):

Serial Number	Attributes	Parameter	Total Cost per annum (Rs. In Lacs)
1	Air Emission	Dust Suppression	0.50
2	Water Environment	Existing Sanitation facilities will be utilized	0.25
3	Solid Hazardous Waste	Handling, Transportation & disposal of non-hazardous solid waste	2.0
4	Noise Environment	PUC certified vehicles, PPE etc	0.25

b) Operation Phase (with Break-up):

Serial Number	Component	Description	Capital cost Rs. In Lacs	Operational and Maintenance cost (Rs. in Lacs/yr)
1	Air	Bag filter, Construction of Common stack of 30 meters, Scrubber installation (1 No.)	13.85	2.0
2	Water	Upgradation of ETP, MEE & Installation of RO& Maintenance.	350	150
3	Noise	Noise Pollution Control, Installation of anti-vibration pads & Enclosure	--	0.50
4	Environment Monitoring	Quarterly Environment Monitoring : Ambient Air Monitoring (PM10, PM2.5, SO2, NOx, CO), Work Place Air Monitoring(VOCs & Fugitive Emissions), Boiler & DG Set Monitoring(TPM, SO2, NOx), Effluent Treated & Untreated(pH, COD, BOD, TSS, TDS, Oil & Grease)	3.0	1.0
5	Occupational Health	Glares, Breathing Masks, Gloves, Boots, Helmets, Ear plugs & Annual Health Checkup of workers.	125	20
6	Green Belt	Green Belt development Maintenance	1.0	7.0
7	Rain Water Harvesting	Rain Water Harvesting Tank	4	0.15
8	Solid Waste	Solid Waste Management & Disposal to CHWTSDF	---	2.0

Any other issues related to environmental sustainability	Not Applicable
Brief information of the project by SEAC	
PP submitted their application for the grant of TOR under category 5(f)B1 as per EIA Notification, 2006. PP presented draft TOR based on standard TOR issued by MoEF & CC published in April, 2015.	
DECISION OF SEAC	
During deliberations, PP requested to postpone the case. Hence deferred	
Specific Conditions by SEAC:	
FINAL RECOMMENDATION	
SEAC-I decided to defer the proposal. Kindly find SEAC decision above.	

Abhay Pimparkar (Secretary SEAC-I)

158th (B) Meeting of State Level Expert Appraisal Committee (SEAC-1)

SEAC Meeting number: 158th (B) ,Day-3 Meeting Date January 4, 2019

Subject: Environment Clearance for Proposed Common Biomedical Waste Treatment Facility

Is a Violation Case: No

1.Name of Project	Proposed Common Biomedical Waste Treatment Facility by Kolhapur Municipal Corporation and SS Services
2.Type of institution	Government
3.Name of Project Proponent	Kolhapur Municipal Corporation and SS Services
4.Name of Consultant	SMS Envocare Ltd. Pune
5.Type of project	Other (Proposed Common Biomedical Waste Treatment Facility)
6.New project/expansion in existing project/modernization/diversification in existing project	New Project
7.If expansion/diversification, whether environmental clearance has been obtained for existing project	Not Applicable
8.Location of the project	C.S. No. 29, Kasba Bavda Kolhapur
9.Taluka	Karveer
10.Village	Kasba Bavda
Correspondence Name:	Mr. Vijay Patil, Health Officer, Kolhapur Municipal Corporation and Abhay kumar Bandu Birnale, Partner, SS Services
Room Number:	814/2/1
Floor:	4th Floor
Building Name:	SHAHIN
Road/Street Name:	Jamadar colony
Locality:	Behind Circuit House
City:	Kolhapur
11.Area of the project	Kolhapur Municipal Corporation area
12.IOD/IOA/Concession/Plan Approval Number	Total 4000 m ² of land has been identified for the facility. Approx. 1 Acre land is already acquired. This is a part of land reserved by KMC for Civic amenities in Municipal Solid Waste handling reserve area. IOD/IOA/Concession/Plan Approval Number: Not Applicable Approved Built-up Area: 4000
13.Note on the initiated work (If applicable)	No any work is initiated. Existing facility will be removed by existing operator. New facility will be developed after securing Environmental Clearance as per EIA Notification 2006 and amendment dated 17th April,
14.LOI / NOC / IOD from MHADA/ Other approvals (If applicable)	Not Applicable
15.Total Plot Area (sq. m.)	1 acre
16.Deductions	Not applicable
17.Net Plot area	Not applicable
18 (a).Proposed Built-up Area (FSI & Non-FSI)	a) FSI area (sq. m.): Not applicable b) Non FSI area (sq. m.): Not applicable c) Total BUA area (sq. m.): 4000
18 (b).Approved Built up area as per DCR	Approved FSI area (sq. m.): Not applicable Approved Non FSI area (sq. m.): Not applicable Date of Approval: 01-12-2018
19.Total ground coverage (m²)	Not applicable
20.Ground-coverage Percentage (%) (Note: Percentage of plot not open to sky)	Not applicable
21.Estimated cost of the project	31000000

Abhay Pimparkar (Secretary SEAC-I)

34.Rain Water Harvesting (RWH)	Level of the Ground water table:	5 m
	Size and no of RWH tank(s) and Quantity:	Not Applicable
	Location of the RWH tank(s):	Not Applicable
	Quantity of recharge pits:	Not Applicable
	Size of recharge pits :	Not Applicable
	Budgetary allocation (Capital cost) :	Not Applicable
	Budgetary allocation (O & M cost) :	Not Applicable
	Details of UGT tanks if any :	Not Applicable
35.Storm water drainage	Natural water drainage pattern:	Natural water drainage if from South direction to North direction towards Panchganga River
	Quantity of storm water:	Not Applicable
	Size of SWD:	Not Applicable
Sewage and Waste water	Sewage generation in KLD:	6.0
	STP technology:	Total water requirement of the proposed project is 13 KLD which is supplied from Kolhapur Municipal Corporation. Total 6 KLD of Effluent shall be generated from the proposed project. Looking to the quantity of effluent, an Effluent Treatment Plant of 6 KLD capacity has been proposed to treat the effluent. Treated effluent shall be used back to the treatment process of unit and excess water shall be used for plantation, water sprinkling and other non-portable domestic uses.
	Capacity of STP (CMD):	1 ETP of 6 KLD Capacity
	Location & area of the STP:	Within the Plant area
	Budgetary allocation (Capital cost):	Included in the Capital cost of project as ETP/STP are integral part of Plant
	Budgetary allocation (O & M cost):	As above
36.Solid waste Management		
Waste generation in the Pre Construction and Construction phase:	Waste generation:	Construction Waste, debris and domestic waste as during construction phase.
	Disposal of the construction waste debris:	Construction waste shall be managed as per Construction & Demolition Waste Management Rule, 2016. Domestic solid waste shall be segregated into organic and inorganic waste. Organic waste shall be managed by composting. Inorganic waste shall be given to Authorized management Agency of KMC
Waste generation in the operation Phase:	Dry waste:	During operation phase 30 persons are engaged in operation phase and approx. 35 kg/day municipal solid waste is generated.
	Wet waste:	Small quantity of wet waste shall be generated.
	Hazardous waste:	Incineration ash- 100-200 kg/day, Residue Waste- 20-30 kg/day, ETP Sludge-100-125 Kg/month shall be generated.
	Biomedical waste (If applicable):	Biomedical waste may be generated in case of causality.
	STP Sludge (Dry sludge):	Not Applicable

Mode of Disposal of waste:	Dry waste:	Domestic solid waste shall be segregated into organic and inorganic waste. Organic waste shall be managed by composting. Inorganic waste shall be given to Authorized management Agency of KMC
	Wet waste:	Small quantity of wet waste shall be generated which will be mostly organic so will be manage by composting
	Hazardous waste:	All generated hazardous waste shall be disposed as per Hazardous and Other Waste (Management and Trans boundary movement) Rule 2016, Biomedical Waste Management Rule, 2016 or as per direction of MPCB
	Biomedical waste (If applicable):	Biomedical waste Shall be managed as per Biomedical Waste Management Rule, 2016. As this is a CBWTF so in house Biomedical waste can be managed within the unit.
	STP Sludge (Dry sludge):	Not Applicable
	Others if any:	Not Applicable
Area requirement:	Location(s):	Total 4000 m2 of land has been identified for the facility. Approx. 1 Acer land is already acquired. This is a part of land reserved by KMC for Civic amenities in Municipal Solid Waste handling reserve area.
	Area for the storage of waste & other material:	Separate space has been provided in the layout for storage of Waste, Ash and other material.
	Area for machinery:	Area for machinery has been demarcated as per Revised Guidelines of CPCB for Establishment of Common Biomedical Waste Management Facility
Budgetary allocation (Capital cost and O&M cost):	Capital cost:	Included in total cost of the project
	O & M cost:	As above

37. Effluent Characteristics

Serial Number	Parameters	Unit	Inlet Effluent Characteristics	Outlet Effluent Characteristics	Effluent discharge standards (MPCB)
1	pH	-	-	6.5-9.0	6.5-9.0
2	Oil & Grease	mg/l	-	10	10
3	BOD (3 days 27 oC)	mg/l	-	30	30
4	COD	mg/l	-	250	250
5	TSS	mg/l	-	100	100
6	TDS	mg/l	-	2100	2100
Amount of effluent generation (CMD):		6.0 KLD			
Capacity of the ETP:		6.0 KLD			
Amount of treated effluent recycled :		3-4 KLD			
Amount of water send to the CETP:		Not applicable as treated effluent shall be managed within the unit and no waste water will be discharge out side from the plant premises.			
Membership of CETP (if require):		Not applicable			
Note on ETP technology to be used		Total 6 KLD of Effluent shall be generated from the proposed project. Looking to the quantity of effluent, an Effluent Treatment Plant of 6 KLD capacity has been proposed to treat the effluent. Treated effluent shall be used back to the treatment process of unit and excess water shall be used for plantation, water sprinkling and other non-portable domestic uses. The ETP will involved Physico-chemical followed by biological treatment.			
Disposal of the ETP sludge		100-125 kg/ day of ETP sludge shall be generated. The same shall be managed as per direction from MPCB>

Brief information of the project by SEAC

PP obtained ToR in 130th meeting of SEAC-1 held on 1-2nd July, 2106. The proposal was considered again in 142nd meeting held on 13th September, 2017 wherein SEAC asked to conduct Public Hearing as per EIA Notification, 2006 and submit reprot along with EIA/EMP.

Now PP submitted EIA/EMP report along with Public Consultation report for appraisal.

DECISION OF SEAC

After detailed deliberations with the PP and their accredited consultant SEAC decided to defer the proposal till PP submits compliance of following points,

Specific Conditions by SEAC:

- 1) PP to submit lay out plan showing internal roads with six meter width and nine meter turning radius, location of pollution control equipment, parking areas, 33% green belt with its dimensions, rain water harvesting structures (locations with dimensions), storm water drain lines, along with index and area statement showing calculations for each area and cross sections of storm water drain and rain water harvesting pits etc.
- 2) PP to submit their alternate plan for the treatment and disposal of biomedical waste generated in their jurisdiction during the period of construction and commissioning of the proposed plant.
- 3) PP to submit revised water balance calculations and effluent geenration calculations with respect to the capacity of Effluent Treatment Plant.
- 4) PP to collect samples from upstram and downstream of the river Panchaganga as baseline data and include the same in the EIA reprot.
- 5) PP to take utmost care to comply with the applicable regulations for the treatment and disposal of Municipal Solid Waste, Sewage Treatment etc. to avoid nuisance to the people residing nearby; PP to include same in the EIA reprot.
- 6) PP to submit detailed plan for redressal of various issues riased by the public during Public Consultation process. PP shall make necessary provision of funds required for this purpose and include cost in the EMP.
- 7) PP to include above points in the EIA/EMP and submit revised EIA/EMP report.

FINAL RECOMMENDATION

Abhay Pimparkar (Secretary SEAC-I)

34.Rain Water Harvesting (RWH)	Level of the Ground water table:	In the area the groundwater level is ranging between 2 m to 6.0 m bgl in the rainy season and 8 m to 10 m in summer season.
	Size and no of RWH tank(s) and Quantity:	As per CGWA guidelines
	Location of the RWH tank(s):	M.L area
	Quantity of recharge pits:	For "C" Type Quarter - It is estimated that about 132.00 m ³ /yr. of rainwater will be recharged to the groundwater through proposed recharge scheme. For "A" Type Quarters:- It is estimated that about 202.00 m ³ /yr. of rainwater will be recharged to the groundwater through proposed recharge scheme.
	Size of recharge pits :	A recharge pit having the dimension of 2m x2.5m and 1.50m deep has been proposed for the "C" type quarters building. For "A" type quarters, a recharge pit of 2.0mx 2.0m and 1.50m deep has been recommended based on the rainfall data. The Parapet wall of 0.30m with one side over flow pipe above the ground level may be constructed. RCC cover should be provided on top of the recharge pit.
	Budgetary allocation (Capital cost) :	Rs 50000
	Budgetary allocation (O & M cost) :	Rs 20000
	Details of UGT tanks if any :	Not Applicable
35.Storm water drainage	Natural water drainage pattern:	The main water course of the area is Kanhan River which flows about 1.5 kms on the eastern side of the lease. The Korardhari nala flows through south of the lease hold area and join at 2.5 km down south-east to Kanhan River. Also there are number of non-perennial water courses and nalas originating from the above mentioned ridges from higher slopes of the hill to main drainage system of Kanhan River.
	Quantity of storm water:	As per CGWA guidelines
	Size of SWD:	As per CGWA guidelines
Sewage and Waste water	Sewage generation in KLD:	500 KLD
	STP technology:	Anerobic
	Capacity of STP (CMD):	No.1 and 500 KLD
	Location & area of the STP:	M.L area
	Budgetary allocation (Capital cost):	Rs 4500000/-
	Budgetary allocation (O & M cost):	Rs 20000/-
36.Solid waste Management		
Waste generation in the Pre Construction and Construction phase:	Waste generation:	It is proposed to store the quantity with single layer of 5 mts height, 100 mts length & 20mts width with 30° slope. On maturity of dump capacity, it will be stabilized by plantation. 31751 MT Mineral reject as Over burden
	Disposal of the construction waste debris:	NA

Waste generation in the operation Phase:	Dry waste:	Over burden waste - 31751 MT
	Wet waste:	Used Oil 1 KL/Month
	Hazardous waste:	NA
	Biomedical waste (If applicable):	NA
	STP Sludge (Dry sludge):	50 Kg/Day
	Others if any:	Not applicable
Mode of Disposal of waste:	Dry waste:	Over burden will be dumped in the mining lease area
	Wet waste:	CPCB/SPCB Authorized processor and recycler
	Hazardous waste:	CPCB/SPCB Authorized processor and recycler
	Biomedical waste (If applicable):	NA
	STP Sludge (Dry sludge):	CHWTSDF
	Others if any:	NA
Area requirement:	Location(s):	M.L area
	Area for the storage of waste & other material:	M.L area
	Area for machinery:	STP plant already installed and E.T.P. will be installed as per based on requirement
Budgetary allocation (Capital cost and O&M cost):	Capital cost:	Rs 43 Lakhs
	O & M cost:	Rs 3 Lakhs

37.Effluent Charecterestics

48. Energy saving by non-conventional method:

A Grid connected 5MW Solar Power Project at Munsar Mine expected to be commissioned in Nov.18. Electricity generated from this Plant will be used as captive at Gumgaon, Kandri and Chikla.

49. Detail calculations & % of saving:

Serial Number	Energy Conservation Measures	Saving %
1	Reduction in running hours of compressor	0.74 Lakh kWh
2	Reduction in consumption by replacing C & S plant BC2 conventional light with 15 W LED	0.07 Lakh kWh
3	Reduction of consumption by introducing transparent roof sheet at substation /compressor ZZ house /generator house building	0.03 Lakh kWh
4	Saving of KWH due to introduction of natural ventilator at roof	0.16 Lakh kWh

50. Details of pollution control Systems

Source	Existing pollution control system	Proposed to be installed
Mining ,Loading and unloading ,transportation of Minerals	Dust suppression and Plantation	All Environmental mitigation measures will be done as per MPCB.

Budgetary allocation (Capital cost and O&M cost):	Capital cost:	Rs 50 lakhs
	O & M cost:	Rs 20 lakhs

	Other Relevant Informations	<p>I. The proposal of Expansion of Gumgaon Manganese mining project belonging to the MOIL Limited is for mining of Manganese mineral with enhancement of production capacity from 90,000 MTPA to 2,03,200 MTPA in the mining lease area of 85.896 ha.</p> <p>II. The project was earlier presented to MoEF for grant of Environmental Clearance at project involves both expansions in ML area and production capacity of existing Gumgaon Underground Mine. The Environmental Clearance was granted vide J-11015/77/2003-IA.II (M) dated 6/12/2004.</p> <p>III. The Gumgaon Mine comprises of three leases- Lease I- 48.5960 Ha, Lease II- 1.33 Ha and Lease III- 35.97 Ha. in Saoner Tehsil, Nagpur District, Maharashtra. Lease was granted in favor of MOIL for 20 Year and hence expiry of lease is 30/06/2022 for Lease-I, 23/02/2014 for Lease-II and 29/06/2020 for Lease-III.</p> <p>IV. Composite scheme of mining & PMCP for all the leases was approved vide letter No. NGP/MN/MPLN-258/NGP. Dated 09/07/2013.</p> <p>V. The Consent is granted for a period upto 30/06/2020 – consent order no. BO/JD(APC)EIC No.:12710/13474-15/R/CC-4324 on dated 29/03/2016.</p> <p>VI. The proposed Manganese mining area of 85.896 Hectare (ha) in Gumgaon, Khapa, Rajna and Tegai Village, Saoner Tehsil, Nagpur District, Maharashtra the Lease deed for Mining Lease has been issued to MOIL over an area of 85.896 ha. in village Gumgaon, khapa, Rajna and Tegai, Tah.: Saoner of Dist: Nagpur of Maharashtra State, by Government of Maharashtra vide letter number MMN-1005/C.R.777/Ind-9, dated 11.05.2007 Corrigendum dated 15/04/2008 (For Lease I – 48.596 Ha), MLV-N-984/2015/3023 dated 21/10/2015 (For Lease II- 1.33 Ha), MMN 2280/127045(2785)IND.9 dated 20/06/1986 corrigendum dated 23/01/1987 & extended up to 29/06/2050 vide letter no. MLV-N/256/2017/1171 dated 15/05/2017 (For Lease III: 35.97 Ha).</p> <p>VII. Scheme of Mining over an area of 85.896 ha of ML in favor of MOIL in Village Gumgaon, Khapa, Rajna and Tegai Tah: Saoner, Distt. Nagpur, Maharashtra State. Approved of Scheme in respect of Manganese ore deposit of Moil Ltd. is vide letter no. NGP/MN/MPLN-258/NGP-2017 on dated 20.06.2017 Lease-I, NGP/MN/MPLN-361/NGP-2017 on dated 07.06.2017 Lease-II & NGP/MN6/MPLN-4013/NGP-2017 on dated 12.07.2017 Lease-III, over an area of 85.896 ha. situated in village- Gumgaon, Khapa, Rajna & Tegai, Tehsil Saoner, District Nagpur of Maharashtra State.</p>

Date: January 4, 2019**

**Page 61
of 63**

**Dr. Umakant Dangat
(Chairman SEAC-I)**

PP submitted their application for the grant of TOR under category 1(a)B1 as per EIA Notification, 2006. PP presented draft TOR based on standard TOR issued by MoEF & CC published in April, 2015.

PP to carry out Public Consultation as per procedure stipulated in the EIA Notification, 2006 and submit point wise compliance of the issues raised during Public Consultation.

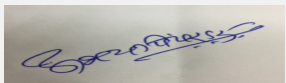

PP to collect base line data as per Office Memorandum issued by MoEF&CC dated 27.08.2017.

The validity of the TOR will be for three years as per OM issued by MoEF and CC on 29.08.2017.

PP to submit Form - 2 along with EIA/EMP report as per OM issued by MoEF&CC on 20.04.2018.

PP to submit their plan to utilize CER (Corporate Environment Responsibility) along with timelines as per OM issued by MoEF&CC dated 01.05.2018.

DECISION OF SEAC

Abhay Pimparkar (Secretary
SEAC-I)

SEAC Meeting No: 158th (B) ,Day-3 Meeting
Date: January 4, 2019

Page 62
of 63

Signature: 
Name: Dr. Umakant Gangotree Dangat
Dr. Umakant Dangat
(Chairman SEAC-I)

PP to submit certified copy of compliance of earlier No. J-11015/77/2003-IA.II (M) dated 06.12.2104 from Regional Office of MoEF&CC, Nagpur as per OM issued by MoEF&CC on 07/09/2017.

During deliberations it was observed that, PP planned beneficiation of the minerals on site which fall under the category 2(b) which is not mentioned by PP in their application. PP to make necessary changes in the Consolidated Statement.

Draft Terms of Reference (TOR) have been discussed and finalized during the meeting of SEAC-1. The committee prescribed the following additional TOR along with Standard TOR as available on the Ministry of Environment, Forest and Climate Change website for preparation of EIA-EMP report.

Specific Conditions by SEAC:

- 1) PP to calculate ecological foot print of propsoed mining activity along with mitigation measures; PP to inlcude same in the EIA report.
- 2) PP to submit details about total beneficiation involved in the proposed activity.
- 3) PP to submit approved mining plan incorporating survey numebrrs, gat Nos etc. in the mining plan.
- 4) PP to attach all lease agreements to the EIA repot.
- 5) PP to conduct study on the impact of drilling/ blasting on the surrounding environment including biodiversity and include the same in EIA report.
- 6) PP to include impact of blasting on the hydrology of the area along with mitigation measures and include the same in EIA report.
- 7) PP shall not take effective steps on site after expiry of exisitng lease period till PP obtain extension of lease from the competent Authority.
- 8) PP to include details of legal requirements under various Acts and Ruels apploicable to the proposed project, current staus of complaince and proposed plan of activities along with time schedule to fulfil all legal requirements.
- 9) PP to submit details of waste management plan in the EIA repot including handling, storage and dispsosal of over burdon.

FINAL RECOMMENDATION

The Committee decided to Grant ToR subject to the above observations,PP requested to prepare and submit EIA report as per EIA Notification, 2006 and amendments thereof.
